

Course catalog for MYSQL Replication

MYSQL Replication

Fee:\$500

Duration : 1 –day SAT/SUN , 10am-6pm

Pre-requisit: [Mysql dba through knowledge](#) , [unix knowledge](#)

Book : [MYSQL administrator Guide and Language Preference](#)

This course covers how to replication the mysql database . This will be covered In 1 day and will show how the complete mysql database and some specific tables are replicated to remote database. We assume that the users have knowledge of mysql DBA with complete understanding .

Steps :

- a. We assume the primary mysql database is already installed .
- b. Creating user/groups and access .on primary and remote .
- c. Creating backup of the database.
- d. Testing the connection from primary to remote mysql database.
- e. Setting some parameter required for mysql replication.
- f. Transfer the backup to remote .
- g. Apply the log and verify if the data is coming to remote database.
- h. After testing complete database replication , we now do few tables replication. So we change some parameter so that only these tables will be replicated to remote .
- i. on remote we do the same steps , restore the tables , and apply the logs .
- j. verification of the tables fresh data .

Note : we assume candidate have enough knowledge about the MYSQL database , otherwise difficult to perform alone . Good concept of MYSQL is very important .
